PROPOSED PYLON ROUTE THROUGH WOODSPRING

Dr Liam Fox, MP for Woodspring, has asked representatives of UK Construction to a meeting at Westminster to discuss the issue of electricity pylons in his constituency. Dr Fox said:

“There is enormous public concern about the environmental and potential health implications of this project. I want to put the concerns of my constituents directly to the company and to explore what options may be available to minimise the impact of these new and much larger pylons. We all understand that we must maintain and improve electricity supplies, something we all use, but the quality of life of local residents must be preserved as much as possible. I will want to explore all the alternatives with the company in detail.”
